Natural Strength from
Amla & **Vitamin C**

Vitamin

Natural Immunity Enhancer

Powerful Antioxidant
Action

Heat & Transport
Stress Relief

Introduction:

Vitamin C is an essential nutrient that plays a vital role in maintaining the health, performance, and immunity of poultry. Birds are easily affected by heat stress, infections, and environmental changes — all of which can reduce productivity. Supplementing with **Vitamin C** helps maintain physiological balance, enhances disease resistance, and ensures optimal growth and production.

Why It's Needed:

- Poultry cannot synthesize enough **Vitamin C** under stress conditions.
- High temperature, transport, vaccination, and disease challenges increase Vitamin C demand.
- Deficiency leads to reduced feed intake, poor growth, weak immunity, and lower egg quality.

Key Benefits:

- **Reduces Heat Stress** – Helps birds cope with summer stress and high temperatures.
- **Boosts Immunity** – Strengthens resistance against bacterial and viral infections.
- **Improves Egg Production & Quality** – Enhances shell strength and yolk color.
- **Enhances Growth Performance** – Promotes better weight gain and feed efficiency.
- **Faster Recovery** – Aids during vaccination, transportation, or disease recovery.
- **Powerful Antioxidant** – Protects body cells from oxidative damage.

Composition

Ascorbic Acid : 50 gm
Excipients : q.s.f.

Dosage & Usage:

20–40 mg/kg given daily to weekly. Laying hens under heat stress will need 200–500 mg/kg added to their diet per day.

Manufactured & Marketed by :

No : 1/258/3, Begapalli Main Road, Bagepalli – Bidaraguppe Road, Begapalli Village,
