## Curcusin+

Curcusin+ is a concentrated Turmeric Oil with superior medicinal value and helps to maintain immunity consistently. Curcusin+ is a proven antibiotic growth promoters. Curcusin+ functions as a natural coloring agent which attracts the Livestock, Poultry and Aquatic animals.

## What is Curcusin+

**Curcusin+** is the by product after solvent extraction from turmeric. The active substances in the Curcusin+ have a wide spectrum of biological activities including Antioxidant, Antibacterial, Antifungal, Antiprotozoal, Antiviral, Anticoccidial & Anti-inflammatory properties.

## Benefits:

- Greater body weight gain.
- Optimise Feed Conversion Ratio (FCR) in broilers.
- Supplementation of layer diet with Curcusin+ meal increased egg production weight, mass and increased the yolk weight and yolk index.
- Studies also show that Curcusin+ has the ability to stimulate the digestive system, increase the secretion of intestinal lipases, amylase, trypsin and chymotrypsin enzymes hence boosting digestibility.
- Dietary supplementation of Curcusin+ ameliorated the harmful effect of Aflatoxin B1 on the body's immune system, showing the humoral immune stimulatory potential in poultry.

## Composition :

Total curcuminoid : NLT 21 %

(Curcumin presence in Curcuminoid : NLT 12%

Demethoxycurcumin and Bisdemethoxycurcumin : NLT 9 %)

Energy (Kcal / Kg) : NLT 9,000 - 11,000

FFA : 5 - 6%

## Dosage:

Broilers, Commercial Layers and Breeders :

In all stages : 200 ml to 400 ml / Per Ton feed.
