

Triact A3

Triple Defense: Gut Health, Toxin Binder, and Liver Protector for Optimal Health

optimizes Gut health

1. Improved Digestibility:

Enzyme Activation: Lowers gut pH to activate digestive enzymes for better nutrient breakdown.

Nutrient Absorption: Enhances absorption of essential nutrients like amino acids, vitamins & minerals.

2. Pathogen Control:

Harmful Bacteria Inhibition: Creates a hostile environment for pathogens like Salmonella and E. coli.

Beneficial Bacteria Promotion: Supports growth of good gut bacteria that suppress harmful microbes.

3. Enhanced Growth and Feed Conversion:

Better Growth Rates: Improved nutrient absorption leads to better growth and health.

Feed Efficiency: More efficient feed conversion reduces costs and improves production.

Liver Protects

Better Digestion and Nutrient Absorption

Enhanced Digestive Function: Supports the liver to improve digestion and nutrient absorption.

Detoxification

Removes Toxins: Helps the liver clear harmful toxins, keeping birds healthier.

Improved Growth and Performance

Faster Growth: Better nutrient absorption and detoxification lead to quicker growth and earlier market weight.

Higher Productivity: Healthier birds are more productive, whether for meat or eggs.

Boosted Immune System

Stronger Immunity: A healthy liver contributes to a stronger immune system.

A Complete Toxinbinder

1. Better Bird Health

Prevents Sickness: Reduces the risk of disease from toxins in feed.

Stronger Immune System: Helps birds stay healthy and avoid illness.

2. Improved Growth

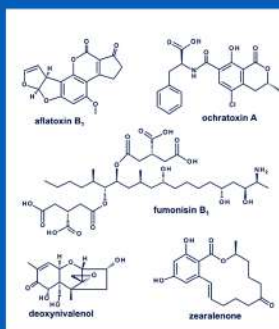

Better Weight Gain: Birds grow faster and reach weight targets sooner.

Efficient Feed Use: Birds use feed more effectively, cutting down on waste.

3. Enhanced Reproduction

More Eggs: Layers produce more and higher-quality eggs.

Healthy Chicks: Breeding birds have healthier chicks with better hatch rates.

Triact A3 optimizes Gut health

1. Immune System Support:

Reduced Pathogen Load: Fewer pathogens reduce the immune system's burden, freeing up energy for growth.

Gut Health: Maintains gut lining integrity, crucial for nutrient absorption and pathogen defense.

2. Reduction of Enteric Diseases:

Diarrhea Prevention: Stabilizes gut pH and promotes beneficial bacteria, preventing diarrhea.

Lower Medication Use: Fewer diseases reduce the need for antibiotics, combating antibiotic resistance.

3. Improved Litter Quality:

Drier Litter: Healthier gut function results in drier feces, improving litter quality and reducing disease risk.

4. Better Egg Production (for Layers):

Egg Quality: Enhanced nutrient absorption improves egg quality, including shell strength and yolk color.

Consistent Production: Healthier birds with better nutrient uptake maintain consistent egg production.

Triact A3 protects liver and enhances the performance

Enhanced Digestion: Improves liver function, aiding in better digestion and nutrient absorption.

Detoxification: Helps the liver remove harmful toxins from the body, keeping birds healthier.

Faster Growth: With improved digestion and detoxification, birds grow more quickly and reach market weight sooner.

Higher Productivity: Healthier birds are more productive in meat or egg production.

Stronger Immunity: Supports a robust immune system, making birds more resistant to illness.

Triact A3 functions as effective Multi toxinbinder

Neutralizing Toxins:

Broad spectrum Toxin Binding Agents: Triact A3 attach to harmful toxins in the gut, stopping them from entering the bloodstream. This reduces the harmful effects of toxins on the birds.

Protecting Gut Health:

Gut Integrity: Keeps the gut lining healthy, which helps birds absorb nutrients better.

Good Bacteria: Supports the growth of beneficial gut bacteria, which can fight off bad bacteria.

Improving Feed Efficiency:

Better Nutrient Absorption: Healthy guts absorb nutrients more effectively.

Lower Feed Costs: Birds need less feed to gain weight, saving on feed costs.

Supporting Immune Function:

Stronger Immunity: Triact A3 helps keep the immune system strong, making birds less likely to get sick.

Fewer Diseases: Healthier birds mean fewer infections and lower mortality rates.

Composition

Blend of Organic acids, High quality Calcium propionate, Propionic acid, Yeast cell wall derivatives MOS, Specially treated Phyllosilicates, High active tectosilicates, HSCAS, Mythyl donors, Activated Carbon, Betaine, Vitamin E, Vitamin C, Saccharomyces Cerevisiae, Liver boosting herbels (Phyllanthus Niruri, Eclipta Alba, Andrographis Paniculata), Chelated Zinc, Manganese and Selenium.

Dosage

500 grams to 1 kg per ton of feed

Manufactured & Marketed by :

1/258/3 , Begapalli – Bidaraguppe Road , Bagepalli Village, Hosur Taluk, Krishnagiri District. 635109
