

C LINK aqua

Encapsulated Vitamin C in coated form

C Link aqua probably is the most important because it is a powerful antioxidant and immune modulator for fishes/shrimps. The fish and shrimp body needs vitamin C to remain in proper health condition.

Benefits

- C Link aqua acts as fast development of embryo/larva and early stages with reduction of mortality in early stages of fishes and shrimps.
- C Link aqua reduces stress and promotes wound healing.
- C Link aqua enhances resistance against disease and reduce mortality.
- C Link aqua improves immune system.
- C Link aqua improves survival rate and FCR.

Dosage

2 - 5 grams per kg Feed or 250 - 500 grams per acre.as directed by aquaculture consultant
