

Zeolite For Aquaculture

Ziocca Powder

Yucca schidigera, Zeolite, Enzyme and Probiotic

Promotes nitrification & sludge degradation;
suppresses pathogens and improves ecological balance

Adsorbs ammonia & toxic gases
via ion exchange; stabilizes water chemistry

Natural ammonia binder
reduces foul odors; inhibits urease activity

Breaks down organic waste
into simpler forms for microbial action

Ziocca powder is a unique blend of high quality ingredients with the superior CEC value can effectively function in binding wide range of ammonia, toxins, drastically digest the bottom sludge and maintain the pond environment suitable for aquatic animals.

Key Benefits

- Maximizes toxin absorption
- Removes toxic ammonia (NH₃), nitrite & harmful gases
- Stabilizes dissolved oxygen levels
- Improves water clarity & overall quality
- Purifies pond water & enhances DO content
- Controls harmful microorganisms & pathogens
- Reduces stress and disease risk
- Supports beneficial microbial activity
- Enhances growth, survival & feed efficiency
- Improves soil and pond bottom quality
- Granular form ensures effective gas adsorption

Composition

Zeolite (clinoptilolite)	- NLT 60 %
Yucca Schidigera	- NLT 8 %
Blend of enzymes	- NLT 7 %
Blend of probiotics	- NLT 20 %
Excipients	- QS

Dosage

1 kg to 3 kg per acre or as recommend by an aqua culture consultant / Expert

Manufactured & Marketed By:

No. 1/258/3, Begapalli Vilage, Begapalli - Biderguppa Road, Hosur - 635126, Krishnagiri
Distict, Tamilnadu, India.
